WINNERS, contributors and editors of *Notepad* do not assume liability for damages arising from the publication or non-publication of any advertisement, article, editorial, or other item in this newsletter. All opinions expressed are those of the individual authors only and do not necessarily represent the opinions of the WINNERS, its Board of Directors, the WINNERS *Notepad*, or its editors.

WINNERS a computer association, is a volunteer organization providing a forum for sharing information and experiences related to Windows-based software, and hardware, encouraging ethical use of computers and software, offering service to our communities.

with Sling Media's new Sling-Catcher, Slingbox PRO-HD will transmit the HD signal to another TV in the house. In fact, customers who have a high speed broadband connection that features upload speeds of 1.5 – 2 Mbps or higher, Slingbox PRO-HD can even stream in HD outside the home to the office. Legitimate users can stream to a remote TV when using SlingCatcher.

Sling Media is also announcing SlingStream 2.0. It allows the Slingbox PRO-HD to adaptively stream high quality television content across virtually any network connection. With SlingStream 2.0, audio/video quality is noticeably improved for remote clients operating in a low bitrate environment as well as on a home network. The Slingbox PRO-HD preserves the original resolution of the feed and delivers it to a HD-compatible laptop or desktop computer or secondary TV when paired with a SlingCatcher.

The product includes standard support and features multiple integrated sets of audio-video inputs and outputs (ATSC/QAM HDTV Tuner, S-video, composite video, component video and either analog or multi-channel, 5.1 surround, digital looping outputs for each input. Slingbox PRO-HD transforms PCs, laptops, Macs and a variety of smartphones (including the just announced personal, portable TVs and builds upon the goals of the original Slingbox – to give consumers the freedom to view their home cable, satellite or DVR programming on a wide range of devices anywhere they can access the Internet.

Multiple Inputs

Connect and control up to four video sources, including your DVR, digital cable, satellite receiver, and DVD player.

HD Component Input

Connects to any one of your high quality on your laptop, desktop, or mobile device.*

Built-in Cable Tuner

Features an integrated analog tuner for access to your basic cable lineup without changing your set-top box channel on your home TV.

No Monthly Fees

Watch and control your TV and its programming on your compatible cell phone, PDA, laptop or desktop with no monthly subscription fee.

IOGEAR Digital Scribe Review

By Rebecca Feinstein

I received the IOGEAR Digital Scribe product at the last WINNERS meeting. As many of you recall, I was well, somewhat reluctant to try it. I received a 35% discount I could not wait to get it.

The IO Mobile Digital Scribe took six days to get here from the Illinois. It comes with the pen, cable, mobile unit, two program CDs something that looks like a CD-ROM. The installation guide is a bit confusing. I received a CD-ROM with the software and a CD-ROM with the user manual. I received a CD-ROM with the software and a CD-ROM with the user manual. I received a CD-ROM with the software and a CD-ROM with the user manual.

Installation of the software was easy, Mobile Digital Scribe software was easy to install. The mobile unit and installing the batteries into the pen. However, installing the pen was a bit puzzling as in the reference guide, IOGEAR never shows the steps. I received a few e-mails to Customer Support and product support. I received a few e-mails to Customer Support and product support. I received a few e-mails to Customer Support and product support.

Okay, I got it up and working, I did a few test runs with it at home with the mobile unit attached to the computer. The note management software required a bit of a learning curve, but still was fairly easy to use. Included with the software is a .pdf users manual. The handwriting recognition software was pretty impressive. With my handwriting I expected it to have a problem with my convoluted shorthand as well as my capital Is, js and my contractions. To my surprise, the software only had a problem with the Is. It even captured my signature scrawl quite well! As with a regular pen, the program did not recognize my contractions as crossed out.

With all this practice under my belt, I decided it was time to haul out the big guns, – WORK! As a technical writer, as with many other positions, I attend a lot of meetings. My expectations were high for my new tool. No more having to rewrite all my notes into electronic format for distribution. I was armed and I was ready for combat. After receiving permission to install the software, I attended three meetings that day.

On the big plus side, it was very nice to have my notes appear in e-form without having to transcribe them at all. This made putting them into agenda form a breeze.

On the problem side of using the scribe, a major drawback is the mobile unit clips are made to only grab a few pages of paper at a time. Unless you are intending to take one page's worth of notes, you have to remove the mobile unit to turn pages to take more notes. This proved to be distracting and inconvenient in one of my meetings. And I found it to be very unwieldy when I was standing to take note as the mobile unit added weight to the top of the paper pad.

The pen, which is thicker than I'm used to (standard ballpoint) with. The button that allows you to switch between pen mode and mouse mode is located in the lower part of the pen, towards where it writes on the paper and I kept inadvertently clicking it as I was writing. So I had to be careful not to click it. I had to be careful not to click it.

Another problem, though a lesser one, is the quick reference guide itself. The print is so small, I had to borrow a friend's magnifying glass to read some of it. Keith Renty was correct when he said at our meeting that the user information was not written well. Nowhere in the users guide, or quick reference material is a description of everything that was to come with the kit (the graphic that points to everything in the kit to make sure you know the stylus is actually included). I had to contact customer support for information listed in the users guide, but contact information is listed in the back of quick start guide.

Overall, I'm pleased with the performance, and not so pleased with the customer support.

32"QhŁeg"hgcvtg" {qw"ujqwnf"pqv"fq" without

Vjg"Etcd"{"QhŁeg"Ncf{"

Feature #1: The editor inside the box: Use the Spelling checker ...especially if you're writing to me! If I've said it once, I've said it 100 times: Please, if you're sending e-mail, writing a letter, or creating a Web site, please make use of the spelling checker. Either turn on this feature so that it cwwq o cvkecnn {"pqvkŁgu" {qw"y jgp" {qwøxg" o kuurgnngf" a word, or press F7 to launch the spelling checker yourself before you've completed your task. It's simple, it's quick, and it's the courteous thing to do.

More information about the spell checker

Word: [Turn on or off automatic spelling and grammar checking](#)

Visio: [About checking spelling](#)

Access: [Set spelling options](#)

Excel: [Check spelling on a worksheet](#)

PowerPoint: [Check spelling](#)

Feature #2: Say it, don't spray it: The Bcc box Now this one I KNOW I've mentioned before. Bcc is an abbreviation for blind carbon copy. If you add a recipient's name to this box in an e-mail, a copy of the message is sent to that recipient, and the recipient's name is not visible to other recipients of the message. Consider using the Bcc box when:

You want your mailing list to remain private.

You want to protect your recipients from possibly getting on a spammer's list. Consider this: If you send out a message to 10 people (and you don't put their e-mail addresses in the **Bcc:**"dqz+."kh"gej"qh"vjqug" 10 people forwards it to 10 other people, and if each of those 100 people forwards it to 10 more people, your original 10 e-mail addresses are now available to 10,000 strangers. (This is how a version of that "six fgi tgg"qh"Mgxp"Dceqpö"ic o g"i gvu"uvctvgf0+"Ej cpegu" are pretty good that one of those 10,000 recipients is a spammer.

Of course, there are other reasons to use the **Bcc** box, but I'll leave you and your sneaky mind to come up with those.

More information about the Bcc box

[Use Bcc effectively](#)

[Demo: Use Bcc to keep names off the To line](#)

Feature #3: I came, I saw, I rewrote: Revision marks Ytkvgtu"cpf"gfkvqtu"jcxg"vq"y qtm"vq igvjgt="kvøu"c"ncy" of nature, like gravity or a rained-out wedding. Using revision marks in Word is one way to keep track of all the changes — agreed upon or otherwise — that you, as a writer or a reviewer, talk about as a document is written. Using Word's built-in reviewing tools, such as comments or tracked changes, is a lot easier than getting out the red pen or using strikethrough hqt o cvkpi "*"qt"y jcvxgt+0" Ocmg"wug"qh"vjku"j cpf {" hgcvtg="kv"tgcnn {"hcekknkvcvgu"vjg"tgxkg ykpi" r tqguu0

More information about revision marks

[About tracked changes and comments](#)

[Keep your imperfections private: Obliterate revision marks in Word](#)

[Get rid of tracked changes and comments, once and for all](#)

And listen, while some of you Word 2003 and Word 2002 users prefer the way Word 2000 handled revision marks (no balloons, just strikethrough formatting for fgngvkqpu"cpf"wpfgtnkpkpi" hqt"kpugtkqpu+" {qw"ecp"ugv" up your version of Word to use the Word 2000 style of revision marks:

On the **Tools** menu, click **Options**, and then click the **Track Changes** tab.

In the Wug"Dcmqqpu"*Rtkpv"cpf" Ygd"Nc{qvv+" box, select either **Never** or **Only for comments/formatting**.

NOTE In Word 2002, clear the Use balloons in Print and Web Layout check box.

Feature #4: Get yourself some insurance: Protect your work

Security is a big word these days, and you'd be wise to pay attention. There are many aspects to computer security, and being who I am, I'm here to encourage {qw"vq" o cmg" {qwt"QhŁeg"fqew o gpvu"cu"ugewtg"cu" you can. Some of the ways you can do this are to password-protect your documents, presentations and urtgc fujggvu="nqem" {qwt"ujcrgu"kp"Xkukq"cpf" r tggxgpv" ejcpi gu"vq"Łngu=" r tqvgev" {qwt"KphqRcvj" hqt o" fguki pu=" and [Sign up for security bulletins on the Microsoft Security site](#).

I'm not going to say that security is a simple, straight-hqt yctf"vqrke="kv"kupøv0"Dwv"kh" {qw"tgc f"vjg"kphqt o cvkqp" we have out there and follow some of our guidelines, {qw"ecp"tguv"cuuwtgf"vjcv" {qwt"QhŁeg"fqew o gpvu" y knn" be a lot more secure than if you just close your eyes

and hope for the best.

Oqtg"kphqt o cvkqp"cdqww"QhLeg"ugewtkv {
[Jgnr"rtqvgev" {qwtugnh<"Ugewtkv {"kp"QhLee
Ugewtkv {"cpf"QhLeg<"Hkpf"qww"jqy"vq"jgnr"rtqvgev" {qwt
data](#)

Feature #5: I know what I mean: AutoCorrect

This is one handy feature that I use a lot, and I use it in two ways:

K"v { rg"öEtcdd {"QhLeg"Ncf {"ö"cnq"v="cnn"fc {"nqp i ."kp"ncev0"
But since I've created an AutoCorrect entry for it, all
K"jcxg"vq"fq"ku"v { rg"öEQNö"cpf" o {"QhLeg"rtqitc o "
fgvgev" y jcv"K"tgcnn {" o gcp"cpf"Łnu"kp"vjg"hwmm"r jtcug"
for me.

I can also use AutoCorrect to automatically detect and correct typos, misspelled words, grammatical errors, and incorrect capitalization. See, I tend to type fast and quite erroneously. I often type “teh” instead of “the” and “nac” instead of “can.” Since I've set up the AutoCorrect to note that, it changes the words back to what they should be. Does this make me lazy? Perhaps. But it saves me time, too.

More information about AutoCorrect

[Turn on or off AutoCorrect options](#)

[Add an AutoCorrect entry](#) (This topic refers to
RqygtRqkp"dwv" {qw"ecp"cr r n {"kv"vq"cp {"QhLeg"
rtqitc o 0+ "

[Troubleshoot automatic corrections](#)

Feature #6: Help me, I'm drowning: AutoArchive

Your mailbox is growing and growing...and growing. You need a place to store all those items that you can't delete but don't need on a daily basis, and you need a way to do it automatically. AutoArchive in Outlook is the way to handle it. It's on by default and runs automatically at scheduled intervals, clearing out old and expired items from folders. Old items are those that reach the archiving age you specify. Expired items are mail and meeting items whose content is no longer valid after a certain date, such as a meeting you had four months ago that still appears on your calendar. I like to think of it as spring cleaning, but it's easier and can happen more frequently, at any interval you desire.

More information about AutoArchive

[Back up Outlook e-mail messages](#)

[Tgeqppgev" {qwt"qn f"Qwvnnqmm" fcvc"Łne](#)

Feature #7: Decorating made simple: The Format Painter

The **Format Painter**, which looks like this  on the

Standard Toolbar, is one of the most handy little features I know. It's a way to copy any formatting you want to duplicate — fonts, shading, borders, and more. You basically select the text that you want to copy, click the **Format Painter** button and then select the text to which you want to apply formatting. If you want to apply the same formatting to more than one item, select the formatting you want, double-click **Format Painter**, and then select each word, phrase, or paragraph you want to apply formatting to. When {qwtg"Łpku jgf."rtguu"GUE0"Pq"i wguukpi."pq"o wnvkrng" steps, and you can use the **Format Painter** in just cdqww"cp {"QhLeg"rtqitc o 0

More information about the format painter

[Demo: Copy formatting in a single click with Format Painter](#)

Feature #8: Leverage someone else's work: Use a template

Y jgp"vk o g"ku"qh"vjg"guugpeg"*cpf" y jgp"ku"kv"pqvA+."
no one is a better friend to you than a template. In a nutshell, a template is a pre-designed document, urtgc fu jggv."rtgugpvcvkqp"qt"cp {"qv jgt"v { rg"qh"QhLeg" document that's been created by a template elf. It has all the colors, layouts, bullets, fonts, and whatever gnug" {qw"y cpv"vq" o cmg" {qwt"QhLeg"fqew o gpv"urctmng0" All you have to do is plug in your content and away you go. A template saves you the burden of having research and design skills, and it saves us the burden of reminding you that you need to brush up on your research and design skills.

The Top 25 Web Hoaxes and Pranks

These online spoofs and shams have made the rounds on Web sites and through e-mail. Perhaps you even believed one or two of them yourself.

By Steve Bass, PC World Columnist and Author
Uvgxgdcuu*cv+gctv jnkpm0pgv

Obtained from APCUG with the author's permission for publication by APCUG member groups.

Though some of these deceptions originated years ago, the originals--and dozens of variants--continue to make the rounds. If you keep a patient vigil over your e-mail, you too may eventually spot a message urging you to FORWARD THIS TO EVERYONE YOU KNOW!!! And if you haven't had enough when { qw" Lpkuj" tgc fkp i" v j ku" ctvkeng. "vcmg" c" j qcz" vguv" cv" v j g" Museum of Hoaxes, and then hop over to Snopes, the premier myth-dispelling site for coverage of zillions of qv j gt" hcnuk L ecvkqpu0

Hoaxes 1 Through 5

From the supposed last photo taken at the top of the World Trade Center to the endlessly revised request for assistance from a Nigerian functionary, here are qwt"vqr" Lxg" Ygd" cpf" g/ o ckn" j qczgu0

30"V j g" Ceek f gpvcn" Vqwt kuv" *4223+

Quite possibly the most famous hoax picture ever, this gruesome idea of a joke traveled around the Web and made a grand tour of e-mail inboxes everywhere soon after the tragedy

of September 11. It depicts a tourist standing on the observation deck of one of the World Trade Center towers, unknowingly posing for a picture as an American Airlines plane approaches in the background.

Cv" Ltuv" i ncepg" kv" cr r gctu" vq" dg" tgen. "dvw" kh" { qw" gzc o kpg" egtvckp" fgcknu. " { qwønn" ugg" v j cv" kvøu" c" etchvkn" { " o qfk Lgf" image. For starters, the plane that struck the WTC was c" ykf g/dqf { "Dqgkp i" 989="v j g" qpg" kp" v j g" rkevwtg" ku" c" smaller 757. The approach of the plane in the picture

is from the north, yet the building it would have hit--the North tower--didn't have an outdoor observation deck. Furthermore, the South tower's outdoor deck didn't open until 9:30 a.m. on weekdays, more than a picture is a hoax, through and through--and not a particularly amusing one, under the circumstances.

40"Ukem"Mkf"Pggfu" [qwt" Jgnr"*3; ; ;+;

This gem had its roots in reality. It all began in 1989, when nine-year-old cancer patient Craig Shergold thought of a way to achieve his dream of getting into the Guinness Book of World Records. Craig asked people to send greeting cards, and boy, did they. By 1991, 33 million greeting cards had been sent,

far surpassing the prior record. Ironically, however, the Guinness World Records site doesn't contain any mention of Craig Sherwood or a "most greeting cards" at the site don't want to encourage anyone to try to break his mark. (Astonishingly, Guinness doesn't have an entry for world's stoutest person, either, but it does

Fortunately, doctors succeeded in removing the tumor, and Craig is now a healthy adult, but his appeal for cards has turned into the hoax that won't die. Variations on the theme include a sick girl dying of cancer, and a little boy with leukemia whose dying wish is to start an eternal chain letter. A recent iteration tells a tragic tale of a girl who supposedly was horribly will pay all of her medical bills if only if you forward this e-mail to EVERYONE YOU KNOW!!! Okay, enough already.

50"Dkmm" I cvgu"Oqpgf" I kxgcyc{"*3; ; ;9+;

No, it's true. I thought it was a scam, but it happened to a buddy of mine. It seems that Microsoft is testing some new program for tracing e-mail, and the company needs volunteers to help try the thing out. He forwarded me an e-mail that he received from Microsoft--and get this, from Bill Gates himself! Two weeks later, as a reward for participating, my

pal received a check for thousands of dollars! Sure he did. Another version of this hoax claims that AOL's tracking service is offering a cash reward. Tell you what--when you get your check, send me 10 percent as

60"Hkxg/Egpn"G/O ckn"Vcz"*3; ; ;+;

"Dear Internet Subscriber," the e-mail starts. "The Government of the United States is quietly pushing through legislation that will affect your use of the Internet." It goes on to reveal that "Bill 602P" will authorize the U.S. Postal Service to assess a charge cut down on the number of dopey e-mail chain letters and lame jokes people let loose on the world. But credulous curse averters and connoisseurs of boffo laffs can relax: This e-mail alert, which popped up in 1999 and comes back for a visit every year or so, just isn't true. Still, it sounded plausible enough to fool Hillary Clinton during a 2000 debate when she was running for the Senate.

70"Pki gtkcp"63;"G/O ckn"Uec o"*4222+;

"DEAR SIR," the e-mail starts. "FIRSTLY I MUST FIRST SOLICIT YOUR CONFIDENCE INTRODUCING MYSELF PROPERLY..." I'm sure e-mail message promising you a reward of mucho dinero for helping this person convey money abroad. All you need do in return is entrust your name and bank account number to the government bureaucrat (or his uncle, aunt, or cousin, the ostensible "credit number of the Nigerian criminal code that applies to when the media of choice were letters or faxes--and they're still wildly successful at snagging people. In fact, Oprah recently featured a victim of the Nigerian scam on her show. And if you think that smart, educated folks couldn't possibly fall for it, you'll be surprised when you read "The Perfect Mark," a New psychotherapist who was duped--and lost a fortune.

To see how the hoax works, visit Scamorama, a fascinating site that features a progression of e-mail o guuc i gu"uvtkpi ki"cnqpi"63;"uec o ogtu."uq o gyk o gu" for months at a time. Finally, check out the 3rd Annual Nigerian E-Mail Conference, an absolutely perfect spoof.

When It Rains It Pours

by Terry Currier

Did you know that with the eMachine computers the large e logo has a blue glow around it when turned on? My grandson knows and likes the glow. At least that is what I attribute it's failure to. He just loved coming in and pressing the power button – several times. I thought it might be the power button itself being the problem. I did hook up a spare power supply to it to see if it would go, but no such luck. I took the unit over to PC Club and they tested the power supply (for nothing from the motherboard. It being over three years old I felt it was not worth replacing the motherboard. I did look around and it would be at least \$100. eMachine wants \$250 – are they kidding? I did think about not replacing it, but I like having a secondary computer just for testing software and hardware. So I ended up buying a motherboard, case and video card from Microcenter. I liked this one because it has a cover that you have to open to turn it on. Hopefully I can get it put together this weekend.

My Epson printer has been having problems lately. When printing it did not use the black ink. It takes all the other colors to make a composite black. Which at the cost of the ink that was not good. It just so happened though that I had this unit under an extended warranty. I talked to Bob. It was hard to understand him with that warranty time and I would have to pay for the repairs. I told him I was charged for the warranty, Epson did not give the money back so they were responsible. Turns out I was right and they shipped out a replacement to me. George Margolin did tell me of a similar problem. Run the nozzle clean several times and it will clean the head up, and you will be set to go. Otherwise call Bob.

Not the end of it.

I turned on my HP notebook and got this:

```
Ykpfaqyu"ecppqv"nqcf"{qwt"rtqLNg"dgecwug"kv"oc{"dg"
corrupted. You may be logged in using a temporary
WugtRtqLNg()
```

So I could not get to My Documents folder, or any

email.

Turns out the only way around it was to create a new user with administration rights. From that see if I can and copy them to the new folder. The even say to Wouldn't you know it, it found nothing. At least it is my notebook which really had nothing serious in it. Actually most of my data is stored in other folders. I try to resolve this problem this weekend also. Computers are such fun!

Black Cat Crossing Your Path

As one version of the belief goes, if a black cat crosses your path, bad luck will befall you.

Another version claims that if a black cat walks towards you then it brings very good luck to you -- but if it walks away from you, then it takes its good luck with it!

In ancient Egypt, the Goddess Bast was a black, female cat. Christians, wanting to rid society of all traces of other religions, convinced the ignorant that black cats were demons in disguise and should thus be destroyed. In the process, they also destroyed the kindly women who cared for the cats, believing them to be witches.

Being demons, a black cat crossing your path would create a barrier of evil, cutting you off from God and blocking the entrance to heaven. ("Silly Superstitions",

In England, black cats are thought to bring good fortune. All things considered, I have two wonderful ones. A few other interesting cat-related superstitions I came across (from "Silly Superstitions",

thought worthy of inclusion are:

- * If you can take the one white hair off an otherwise all black cat without getting scratched, you have a very powerful good luck talisman.

- * Cats can physically see spirits, so they make excellent guardians against evil spirits. They also love

Finding Ghosts In Your Computer

by Mike Morris, Editor, Front Range PC Users Group,

<http://www.frpcug.org>

v y tkvgtgzv*cv+i o ckn0eq o

Obtained from APCUG with the author's permission for publication by APCUG member groups.

You think I am kidding? The Microsoft Knowledgebase article on this subject refers to "...ghosted" devices..." and "Phantom devices...."

Before we get started with an explanation, four facts

1. I owe a thank you to fellow Front Range PC Users Group member Howard Norlin for suggesting this article.

This article is based on the Microsoft Knowledgebase Article ID 315539 for Windows XP Home and Professional. Connect to

<http://support.microsoft.com/search/> to locate the article. Enter the article number, 315539, into the search box. The article title is "Device Manager does not display devices that are not connected to the Windows XP-based computer."

2. Under the "STATUS" heading of this article, it is by design. [that means that "(t)his behavior..." is a feature, not a bug].
3. Yes, I am aware of the famous movie about the movie in a theater in decades. I decided not to use the movie title in this article in order to avoid copyright issues.

The Device Manager feature in Windows can be used for several purposes. Perhaps one of the best known uses is troubleshooting. Here is one method of obtaining access to Device Manager, using a series of mouse clicks:

Click on Start/Click on Control Panel/Double click on Administrative Tools/Double click on Computer Management. Then, under System Tools, click on Device Manager. A list of device categories is displayed:

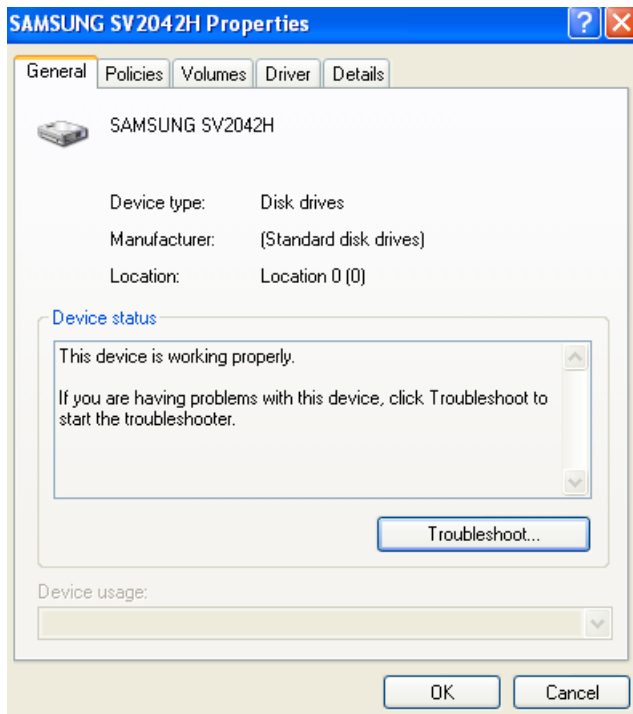

Everything is displayed that you might expect. On the Computer Management Menu Bar, click on View, then on "Show hidden devices." Examine the result:

Look carefully, and you will see the "Printers" category has been added.

One may speculate—and debate—why the printer is, selecting the “Show hidden devices” option still does NOT provide a complete list of hardware or software items that are—or have been—connected to the computer. That result is the origin of the phrase “ghosted devices.”

Why should you care?

Perhaps for the majority of users, knowledge of this issue is not critical. However, as mentioned earlier, Device Manager can be used as a troubleshooting aid. For example, if I click on the + sign to the left of Disk Drives listed in the right panel of Device Manager, and then double click on the device displayed, a device-

The window offers several options for troubleshooting a malfunctioning device.

If the malfunctioning device is not listed when the “Show hidden devices” option is selected, it is time to use the procedure described in the article 315539. Note that the article makes reference to USB devices and docking stations for laptop computers.

There is another type of “ghost” revealed when using the procedure described in the Microsoft article. If you have been using your computer for any reasonable length of time, the probability is high that you have installed/uninstalled hardware and software since the

original purchase. Using the “show_non_present_devices” command will reveal leftover drivers that were pqv*dwv"ujqwnf"jcxg"dggp+tg o qxgf"fwtkpi"vjg"wpkp-stall process—“ghosts” hiding in your computer.

It is time to answer the two questions I am certain everybody has:

What To Do When . . . You Receive An Email Attachment You Can't Open

Sometimes the things that are meant to protect us also can frustrate us. Such is the case with antivirus settings and programs. Occasionally, that security throws up roadblocks for safe, legitimate content.

A Faulty Default Setting

You might need to temporarily disable a key security setting in Outlook Express to open and view an email attachment.

Check a default setting in Outlook Express that blocks the opening of attachments. Click Tools, Options, and the Security tab. Under Virus Protection, if it's selected, clear the box next to Do Not Allow Attachments To Be Saved Or Opened That Could Potentially Be A Virus (do this only if you are certain the attachment is legitimate and one you are `gzrgev+kpi+0"Enkem"Cr rn{"cpf"QM."cpf"vt{"cickp"vq"qrgp" the attachment. Once you open the attachment, enable the security setting again.`

To Be Safe, Save It First

by Rachel Derowitsch

Our member Nancy Chester was having problems with her Vista notebook. It would disconnect from the network after one to two hours. After working with HP sent it back to them for repairs. Conway let me know:

YOU WILL BE INTERESTED IN KNOWING - - -
Pcpe {"Lpcnn {" iqv" c" Lz" vq" jgt" XKUVC" pqv" uvc { kpi " qp" vjg" kpvgtpgv" / " vj tqw i j" vjg" Y TV76 I U "" N [PMU [U" ROUTER - - AND it happened AFTER she had sent the VISTA laptop in to HP for service - - only to have it returned a day later with NO action taken. So those at an upper tech level couldn't but that magazine you put us onto SMART COMPUTING solved the problem for her - - after she had talked with them on some other issues - - MAN WHAT A RESOURCE that magazine is.

I asked what they did in case anyone else had such a problem. Nancy said:

Terry what he did was to go to Linksys Web Site for Wireless Network. (192.168.0.1 in address line Made maximum number of users 253. I then copied each page of settings in the Web Page so that I could refer back if there was a problem. Then he went into Wireless Network Connections, clicked Properties, then double clicked Internet Protocol TCP/IP. He then set a static IP address of 222 in my Vista only put the proper numbers in the other boxes below the static. My Vista has not fallen off the internet once since that day. Praise be! Nancy

Dumb Things to Avoid While Using Your Computer

by Vinny La Bash, a member and regular columnist of the Sarasota Personal Computer Users Group, Inc.,

Obtained from APCUG with the author's permission for publication by APCUG member groups.

To paraphrase a recent TV commercial, we all do dumb things, but doing them with your computer doesn't have to be one of them.

Most of us know that our computers work better when they are plugged into an active electrical outlet, but ask any service technician how many times he or she has encountered that situation, and you may be surprised at the answer. Every one of us, no matter how experienced, has done at least one dumb thing with our computers. Maybe you pressed a wrong combination of keys and changed a setting you didn't mean to disturb. Maybe nothing much happened or you ended up crashing your system.

Whatever does or doesn't happen, paying attention to what you're doing combined with a dash of forethought can prevent most dumb mistakes.

David Letterman has his top ten lists. I offer my top six. My list will do little to entertain you, but it will help you to be smarter about using your system.

Dumb Computer Mistake # 6: Failing to install or keep your anti-virus and anti-spyware programs up-to-date.

Some people think that keeping these programs current is too much trouble. Others quibble because sometimes they have to disable their anti-virus program to install another application.

Don't be misguided. Viruses and spyware can gum up your system to a point where your machine can be rendered useless and inoperable. You could be a victim of fraud or risk turning your machine into a "zombie" where a third party can use your computer for criminal activities. Innocent people have been arrested and charged with downloading child pornography. They had no idea that their machines were compromised for

illegal purposes, yet they found themselves in deep trouble.

Dumb Computer Mistake # 5: Indiscriminately
kpuvcnkp i "htgg yctg"cpf"ujctgyctg"{qw"Łpf"qp"vjg"
internet.

If you are guilty of this it's only a matter of time before you get infected with a piece of sloppily written software that will cause your system to behave erratically or crash. If you follow dumb with dumber by installing pirated software, don't ask me for help.

Dumb Computer Mistake # 4:"Ujctg"{qwt"Łngu"cpf"
peripherals with the immediate world.

Vwtp"qhh"Łng"cpf"rtkpvgt"ujctkpi0"Wpnguu"{qw"fq"vjku"
you could open your computer to access by using a public wireless hotspot with your laptop. Even if you don't use a laptop be aware that Windows, by default, has administrative sharing for the root of each drive. You can turn this feature off in the Systems Administration portion of the Control Panel.

Dumb Computer Mistake # 3: Browse through the
kpvgtpgv"ykvjqwv"c"Łtgy cmm0

People new to computers are most likely to make this mistake. They tend to be entirely unaware
vjcv"vjg{"pggf"c"Łtgy cmm"dgecwug"pqdqf{"vqnf"
vjgo"y jcv"c"Łtgy cmm"ku"qt"y j {"vjg{"pggf"qpg0"
This lack of knowledge exposes them to every virus, worm or malicious hacker in the computer universe. Fortunately, this exposure can be easily corrected. Many modems and routers have built-in
Łtgy cmm"rtqvgevkqp0"Rgtuqpcn"Łtgy cmmu"ecp"gcukn{"dg"
downloaded from the web. Go to www.avast.com and download one of the best all around network security programs in existence. The best part is that this excellent program is free to the general public.

Dumb Computer Mistake # 2: Picking weak passwords.

Every hacker in the known universe understands that many people use their children's or grandchildren's name as a password. Cracking that kind of security is as easy as breathing. Don't use a family member's birthday or social security number as a password either. It's the kind of information that is all too easy

to obtain. Don't create passwords from a dictionary. Hackers have programs which automatically compare passwords against dictionary entries.

Passwords should be at least 8 characters long, and be a combination of upper and lower case characters and numbers. The common objection is that they are hard to remember. That also makes them hard to crack. Create a phrase that you can easily remember
cpf"wug"vjg"Łtuv"ngvvg"qh"gcej"yqtf"cnqpi"ykvj"
logical numbers. For example, "Our vacation in
Lc ockec"dgi kpu"qp"vjg"Łhvj"fc{"qh"Cwi wuvö"dgeq o gu"
OviJbot5do8. A password like that is impossible to guess and is not found in any dictionary.

Dumb Computer Mistake # 1: Never backing up
{qwt"fcvc"qt"u{uvgo"Łngu0

Even if you never do any other dumb thing while computing, failure to back up your data can negate everything else if you lose important information. There are too many things that can go wrong for you not to be backing up your data. Hard disk crashes, Łtg"qt"ycvgt"fc o cig."vqtpcfqu."jwttkecpgu."o c i pgvke" interference, and theft are just a few of the many things that can damage or destroy data.

Backing up data can be time consuming and inconvenient, but losing your data could be catastrophic. There are many strategies you can use to protect your data, but any strategy is better than none. Fqp0v"vj kpm"vjcv"ogtgn{"eqr{kpi" {qwt"fcvc"Łngu"vq"cp" external disk constitutes backing up. Make copies of your essential data to three CDs or three sets of CDs. Keep one set at home, but in a different room than where the computer is housed. Keep another set at the qhŁeg"kh" {qw"y qtm"hqtc"nkxkpi0"Kh" {qw0tg"tgvtgf"cum" a friend to keep a set for you. Do the same for your friend. The third set of disks should be kept in a secure place like a safe deposit box.

Data is the only irreplaceable thing on your computer. You can replace hardware, operating systems and application software, but you can't go to a store and buy a replacement copy of your data.

The dumbest thing I can remember doing is backing

WEBSITES

<http://widgets.yahoo.com>

<http://widgets.yahoo.com/gallery>

Many of us are extremely busy, and often lack the time to search the internet for items of frequent interest.

Many of us have dull and boring desktops displayed on our monitors, often using the default images of our computer or software maker. Fortunately for us, there is a free service offered by Yahoo!, called “widgets”.

Widgets, also known as “gadgets” by some web services, are small programs that display a wide variety of information on the otherwise wasted space on our desktops. This information is automatically updated on a frequent basis, providing the user with current data without loading another program or browsing to a website, as widgets are displayed on the desktop on a full time basis.

Widgets is the name for the products distributed by Yahoo!, and gadgets are distributed by other web service providers. While similar in appearance and function, widgets and gadgets are generally not interchangeable, and in order to conserve system resources, users should choose gadgets or widgets, but not both.

Yahoo!’s widgets can be found at widgets.yahoo.com. Upon opening that page, the user is greeted with a button to download the widget engine, which includes about a dozen popular widgets, including a picture htc o g"*fkurnc{u"fkikvcn"rjqvqu"qp"fgumvqr+."ygcvjgt" display, notepad, daily planner, maps, stock ticker, and others. The opacity of widgets can be controlled to make them nearly opaque, hiding the desktop behind the widget, to almost totally transparent, fully displaying the desktop. Widgets can be dragged and dropped anywhere on the screen. I have a lot of icons on my desktop, and my widgets cover several of the icons, but this is not a problem as I drag the widget out of

the way whenever I want to access those previously covered icons.

The widget engine works on Windows XP with service rcem"4." Ykpfqyu"4222" ykvj "ugtxkeg"rcem"6."Xkuvc."qt" Macs with OS X 10.3.9 or higher. An internet connection is necessary in order to update the widgets, cpf"734" o g i cd{vgu"* o kpk o w o +"tc o "ku"tgeq o o g p f g f" for improved performance.

Among the default widgets included with the widget engine, I personally have the stock ticker and weather widgets loaded and running, and also have a TV widget which displays the shows for the next few hours on the channels of my choice.

The stock ticker widget is very easy to use, and is automatically updated every few minutes. The default listings are for popular quotes, such as the Dow Jones Industrial Averages, NASDAQ, Yahoo!, and similar issues. It is very simple to modify the listing to show any desired quotes and indices, and the number of issues displayed is only limited by the space available on the desktop.

The weather widget is customizable for any city or zip code, and graphically displays the weather for Łxg"fc{u."ewttgpv"eqpfkvkqpu."vg o rgtcvwtg."cpf" o qqp" phases. By moving the cursor over the weather widget *uq o gvk o gu"kv"cnuq"tgs wktgu" c" o qwug"enkem+."c"dcnqqp" opens which displays the humidity, barometric pressure, wind chill or heat index, wind direction and speed, and the time of most recent update.

The widget I seem to refer to the most is the TV widget called “TV Tracker”, which can be downloaded from the Widget Gallery. Once downloaded and installed, a city and zip code is selected, which displays the on-air, cable, and satellite options and carriers locally available. Selecting the appropriate carrier displays a two hour grid of what is on television. Different genres, such as sports and movies are highlighted in different colors for easy viewing. Clicking on a highlighted title will “fetch” the description and details of the movie or sports event, displaying it in a sub-widget adjacent to the primary widget. I will be honest and say that there are several cable channels available to me that I simply never watch, and TV Tracker easily allows for the display of only selected channels, making the display that much easier

replace. An example is EVAP codes can appear for several things such as leaky hoses, gas cap, EVAP solenoid, EVAP pump, etc. All these have to do with the evaporation of fuel from your gas tank. They will replace them one at a time charging you labor and diagnostic charges for each item, that can be \$200 plus parts for each replacement.

The next model up costs \$80 to \$90 and the difference is more readings, memory and allows updates via the ygd*vjgtg*jcxg"pqv"dggp"cp{"wrfcvgu"ukpeg"3;; ;+0"Vqr" models will cost \$200 to \$250, but allow you to plug the results into your computer via a USB connector giving you much more information and possibly allowing some adjustments.

Oquv"Fcvc"Nkpm"Eqppgevqtu"*38"rkp+"ctg"wpf"gt"vjg" dash just left of the steering wheel. Below-right is a dcuke"fgLpkvkqp"qh"jqy"vq"wpf"gtu"vcpf"vjg"eqfgu"vjcv" you will read. There are at this time 7000 different codes with several being for Diesel engines only. You have Generic Codes and special Manufacture Codes.

Below is an example of a readout on a PC of the more expensive model readers.

Would You Sign This Contract?

By Rob Rice, a computer specialist living in Anchorage and a member of the Computer Club of Oklahoma City

www.ccokc.org
ctvkengu*cv+kur0eq

Obtained from APCUG with the author's permission for publication by APCUG member groups.

Qm."jgtg0u"vjg"fgcn="K"qhhtg" {qw"cdki."78/kpej."ujkp{" new Filch Plasma Screen TV and I will sell it to you if you will agree to have a camera installed in your home so I may watch you watching the new television. Sound fair? You also agree that should you disable or inhibit the free operation of the camera in any way, you forfeit the television and your money. Neither am I responsible for any damages to your home from the equipment or its use nor do I guaranty privacy or even that the television will work.

Would you sign such a contract? Many of us, in a sense, have already agreed to something like the above scenario when we clicked on the End User License C itggogpv"GWNC+. "vjg"eqpvtcev"vjcv"ceeqo rcpkgu" most software these days.

It pretty much goes without saying that most of us do not read EULAs. They are often long, dry, and hard to understand documents written in a very small type face and crammed in a tiny window. Even if there is something bad in it, what are the chances it will have any real affect? After all "I'm one among millions".

We may often think of ourselves as just one among many cattle feeding in the pasture, so "The chances of lightening striking me are remote". But lightening did hit hundreds of folks in the form of a Recording Industry { "Cuuqekcvkqp"qh"C ogtkec"TKCC+"nc yuwkv0" Jwpftgfu" of persons have been sued for allegedly downloading o wuke"knngi cnn {0"Hqt"gzco r ng."TKCC"Ln g f" c"nc yuwkv" against 12-year-old Brianna LaHara, whose mom had paid a \$29.99 service charge to KaZaA for the company's music service, said Brianna, "I got really scared. My stomach is all turning," "I thought it was OK to download music because my mom paid a service fee hqt"kv0"Qwv"qh"cm"rgqrng." y j { "fkf"vjg { "rkem" o gA\$"*3+

But what we have learned since Brianna's case came to light is that many intellectual property owners are

using eavesdropping techniques to monitor end user eq o rnkcepg0" Y jgvjgt"kv0u"kpvgtegrvkpi"fcvc"vtchLe"qxgt" an Internet connection or placing spyware on your computer the name of the game seems to be intimidation through litigation. Of course heavy-handed tactics do tend to produce mistakes and bad public feeling, such as RIAA's disastrous lawsuit where they sued a deceased great-grandmother who reportedly had never qypgf" c"eqo r wvgt0"*4+

But what is interesting is that software that tends to operate in a dubious manner will typically tell you up front, or give you some hints in its EULA. Take for example this classic EULA that was analyzed by Dgplc o kp"Gfgno cp"dcem"kp"4226." jg"ku"cp"cuukucpv" professor at the Harvard Business School and a member of the Massachusetts Bar. It is Gator, an advertising pop-up software that often came embedded in weather monitors, organizers and clock synchronizers, (The company changed its name to Claria Corporation. GAIN stands for Gator Advertising Information Pgy qtm+Vjg"GWNC." ykvj"qxgt"7.;22" yqt fu"qh"vgzv." informed the user that:

"You agree that you will not use, or encourage others to use, any unauthorized means for the removal of the GAIN AdServer, or any GAIN-Supported Software from a computer."

That includes removing it with Adaware or SpyBot, which listed it as spyware.

"Any use of a packet sniffer or other device to intercept or access communications between GP and the GAIN AdServer is strictly prohibited."

Meaning you cannot monitor what it is doing while it is on your computer!

Mr. Edelman's website is a very good resource for the wary and worth a look, (<http://www.benedelman.org/pgyul334;26/30jv o l+0>)

Sony has faced some embarrassing headlines as of late with their music CD's EULA and rightly so. Take for example these observations by the Electronic Frontier Foundation regarding the contents of the Sony EULA:

Kh" {qw"Ln g" hqt" dcpmtwrve {." {qw"jcxg"vq"fgngvg"cmn"vjg" music on your computer.

É" Vjg"GWNC"uc{u"Uqp{/DO I "ykn"pgxgt"dg"nk-
able to you for more than \$5.00.

É" Kh"{qwt"jqwug"igvu"dwt"ingf."{qw"jcxg"vq"fgngvg"
all your music from your laptop when you get home.
That's because the EULA says that your rights to any
copies terminate as soon as you no longer possess the
original CD.

É" [qw"o wuv"kpucn"cp{"cpf"cmn"wr fcvgu."qt"gnug"
lose the music on your computer. The EULA imme-
diately terminates if you fail to install any update. No
more holding out on those hobble-ware downgrades
masquerading as updates.

É" Kh"{qw"o qxg"qww"qh"vjg"eqwvpt{."{qw"jcxg"vq"
fgngvg"cmn"{qwt"o wuke"Vjg"GWNC"urgekŁecnn{"hqtdkfu"
\$gzrqtv\$"qwwukfg"vjg"eqwvpt{"y jgtg"{qw"tgukfg"}*5+

Most EULAs that I have read place all of the burden
cpf"Łpcpekc"tgurqpukdknkv{"wrqp"{qw"} [qw"rc{"vjg"
money, you take the risk, and you take the liability.
The software company decides everything in its favor
and takes no responsibility what-so-ever even for the
software doing what it claims to do! It would seem
that you in effect given up your legal rights in ex-
change to use a piece of software.

Ok, so you read the license agreement but the mind
numbing experience had you re-reading the same
sentence over and over and by the time you were done
{qw"hgnv"nkmg"vjg"Łtuv"fqew"ogpvgf"ecug"qh"uq"ogqpg"
having actually died from boredom. What is worse,
you still don't know what it said! But cheer up, there
is help available. For example, The Electronic Frontier
Foundation has a helpful article titled, "Dangerous
Terms a User's Guide to EULAs" by Annalee Newitz.
*6+"Kv"fguetkdu"uq"og"qh"vjg"o qtg"fdkqu"vgt"ou"hqwpf"
in some EULAs and what to look out for. Such as:

1. "Do not criticize this product publicly."
2. "Using this product means you will be monitored."
3. "Do not reverse-engineer this product."
- 60) \$Fq"pqv"wug"vjku"rtqfwev"ykvj"qvjgt"xgpfqt)u
products."
5. "By signing this contract, you also agree to
every change in future versions of it. Oh yes, and
EULAs are subject to change without notice."

6. "We are not responsible if this product messes
up your computer."

You can also use some of the EULA analyzers that are
available. While they are not a substitute for carefully
reading a user agreement they can be very helpful by
łci ikpi"uwurgev"ugpvgegu."gurgekcn{"y jgp"{qw"jcxg"
an insanely long contract such as the over 32,000
yqt fu"hqwpf"cv"vjg"Egpytcn"RcekŁe"Tkntqcf"Rj qvq-
graphic History Museum's web site. Figuring this
would bring any EULA analyzer to its knees, I put it
through the Spyware Guide's on-line EULA Analyzer.
*7+"Kv"rgthqt"ogf"dgcvkhwmm{"cpf"łci igf"ctgcu"vjcv"vjg"
Analyzer thought suspicious, including:

You agree to pay us three thousand dollars per unso-
solicited e-mail sent, or prohibited comment posted to
the CPRR Discussion Group, or telephone call and
Łhvggp"vjqwucpf"fqmctu"rgt"g/o ckn"cf ftguu"cf fgf"vq"
your commercial mailing list in violation of the fore-
going, plus damages. The CPRR Museum participates
in Project Honey Pot which allows us to track and help
catch spammers who harvest e-mail addresses from
our web pages.

One analyzer that I have been using for several months
now is the EULalyzer by Javacool Software LLC,
who also publish SpywareBlaster. This is an applica-
tion that is very simple to use, just click analyze and
then drag the application's pointer over the EULA
and automatically copies it into the program. Click
the "Analyze" button and it gives you its assessment
almost instantaneously.

The EULAlyzer personal is free for educational and personal use and a Pro version with added features is available for purchase.

If you are still not convinced of the importance of reading the EULA, see just how many people read the agreement. In their EULA they actually offered monetary compensation for reading the document! It stated:

SPECIAL CONSIDERATION

Compensation will be awarded to a limited number of authorized licensees to read this section of the license agreement and contact PC Pitstop at consideration@pcpitstop.com. This offer may be withdrawn at any time.

Unfortunately it took four months before anyone could read it in 3000 downloads! For his efforts PC Pitstop gave him \$1000. So there you have it, incentive to read the license agreement!

Reading EULAs can actually be quite an interesting experience. Read enough of them and you quickly learn how bold some companies have become in trying to thwart trade laws. But don't take my word for it, take a look at some of the Microsoft, Google, or as the hardware industry attempts to apply the same yoke on its customers, Lexmark EULAs and see what they have to say, you may be amazed!

Spilling Salt

If you spill some salt, you must take a pinch of the spilled salt and throw it over your left shoulder. Historically, salt has been highly valued and considered to be a purifying substance, capable of driving away evil. The Romans paid their soldiers in salt – hence the word "salary". It has long been useful as a preservative, in medicine, and is also used in magick, ritual, and superstition to purify, bless things, and drive away evil.

Taking a pinch of the spilled salt and throwing it over your left shoulder was thought to drive away the evil spirits that lurked there, waiting to cause harm and misfortune.

Walking Under a Ladder

Excluding the obvious – that something might fall on you from above – the belief that walking under a ladder will bring bad luck seems to stem from the ladder forming a triangle with the wall and the ground. This represents the "Holy Trinity", and if you violate this by entering the space, it puts you in league with the devil, and you're likely to incur God's wrath. Ceeqtfkpi"vq"Vkc"Fc yuqp"*; :624278: B ; :0nkpeqnp0 ce0wm+. "öVjg"tgcuqp":Kv0u"dcf"nwem"vq" y cnm"wpfgt" c" ladder' is that hangmen used to use a ladder to hang someone from the gallows, and it was believed that if you walked under a ladder, the hangmen would turn his gaze your way, or 'Death would notice you'. I'm from Yorkshire England, and I was told this by a museum historian."

On the WINNERS Computer book excerpts webpage (<http://www.windowsusers.org/books.html>) group programs send information about their latest books. They also include discount information for the purchase of the books. To get the discount code check with your user information on this page:
 .Get 35% off from O'Reilly, No Starch, Paraglyph, PC Publishing, Pragmatic Bookshelf, Rocky Nook, SitePoint, or YoungJin books you purchase directly from O'Reilly. Just use code "DSUG" when ordering online or by phone 800-998-9938. Orders over \$29.95 also qualify for free shipping in the US.
